

MAINTENANCE & CARE GUIDE

Brass Chrome-surface Faucets · Glass Cubicles · Bathtubs

01 BRASS CHROME-SURFACE POLISHED FAUCETS

Daily & Long-term Care

DO NOT

NO CHEMICALS

Never use bleach, acid-based cleaners or abrasive pads. These strip chrome plating permanently.

DO

RINSE DAILY

Rinse with warm water after each use to prevent mineral and soap deposit build-up.

DO

MILD SOAP ONLY

Use a few drops of mild dish soap with a soft microfibre cloth. Never use scouring pads.

DO

DRY IMMEDIATELY

After cleaning, dry thoroughly with a soft cloth to prevent water spots and tarnishing.

★ PRO TIP: Apply a thin layer of car wax (non-abrasive) every 3 months to protect the chrome finish from oxidation.

02 GLASS SHOWER CUBICLES

Cleaning & Maintenance

DO NOT

NO HARD TOOLS

Never use metal scrapers, steel wool or razor blades on glass panels. Permanent scratching will occur.

DO NOT

NO ACID/ALKALI

Avoid ammonia-based cleaners and acidic descalers — they cloud and etch tempered glass permanently.

DO

SQUEEGEE AFTER

Use a rubber squeegee after every shower to remove water. This prevents limescale 90% of the time.

DO

WHITE VINEGAR

For stubborn limescale, spray diluted white vinegar (1:1 water), leave 5 min, wipe with soft cloth.

★ PRO TIP: Apply a hydrophobic glass coating (Rain-X or similar) quarterly — water beads off and cleaning becomes effortless.

03 BATHTUBS — ACRYLIC, WHIRLPOOL & FREESTANDING

Care & Longevity

DO NOT	DO NOT	DO	DO
 NO SOLVENTS Never use acetone, turpentine or solvent-based cleaners — they craze acrylic and void warranties.	 NO ABRASIVES Avoid scouring pads, powder cleaners and stiff brushes. These scratch acrylic and enamel surfaces irreversibly.	 SOFT CLOTH ONLY Use a non-scratch sponge or microfibre cloth with mild liquid soap. Rinse completely with warm water.	 RINSE AFTER USE Rinse the tub after every use. Standing water with soap residue causes staining over time.

★ **PRO TIP:** WHIRLPOOL TIP: Run jets with warm water + 2 tbsp citric acid monthly to clean internal pipes. Prevents biofilm and odours.

QUICK REFERENCE — AT A GLANCE

Summary Chart

PRODUCT	DAILY RINSE	MILD SOAP	CHEMICALS	ABRASIVES
Chrome Faucets	✓	✓	✗ Never	✗ Never
Glass Cubicles	✓	✓	✗ Never	✗ Never
Acrylic Bathtub	✓	✓	✗ Never	✗ Never
Whirlpool Tub	✓	✓	✗ Never	✗ Never

RECOMMENDED MAINTENANCE SCHEDULE

AFTER EVERY USE	Rinse with warm water · Squeegee glass panels · Dry chrome faucets with soft cloth
WEEKLY	Wipe all surfaces with mild soap + microfibre cloth · Check for leaks around faucet base
MONTHLY	Deep clean glass with diluted white vinegar · Flush whirlpool jets · Inspect seals & gaskets
EVERY 3 MONTHS	Apply chrome wax to faucets · Apply hydrophobic coating to glass · Check drain stoppers
ANNUALLY	Professional inspection of all fittings, joints, and seals recommended

■ **WARRANTY NOTICE:** Use of chemical cleaners, abrasives, or non-recommended products will void your TUFF product warranty.
